

Federal Communications Commission, I depend on XM Satellite radio's weather AND traffic reports as valuable tools for my business, without them the chances of my business surviving are tremendously reduced. Is this the goal of your commission, to squash small businesses and their owners by limiting the amount of useful information available to them?

Here is another example of 'big brother' interfering for the sake of the big bad corporate monster, when he should be looking out for US. Don't make a bad idea into policy. Don't cave in to lobbyists, step up and REJECT NAB's petition 04-160, let XM do their thing so that I can do mine.

Respectfully,  
CJ Reagan
